Your cover is the most important part of your book and must stand out on Amazon alongside all the competition! We will work with you to create a custom design that you love and attract your audience by using the best typography and color for your genre. INTERIOR BOOK FORMATTING

We work with professionally edited manuscripts **ONLY**. But we can talk long before you get to that point so we can plan and strategize with you. Whether it's a novel or advanced book layout with end notes and images, our job is to format your book using Adobe's InDesign Book Function.

We build an interior layout that is well organized and easy to read that follows professional book layout principals. We create the overall style and send you a sample for you to approve. Then we move forward to create your book.

You will proof the book before it's finalized and then we create the final pdf files for print and ebook. Finally, we work with you to send your book files to print without issue.

STARTING AT
\$1200

PRICING IS BASED ON WORD COUNT AND COMPLEXITY OF LAYOUT. *The base price is for an average length novel (around 50,000 words) without images, graphs, citations or any additional back matter. We encourage you to contact us early in the process of writing so we can make sure we can fit your project on our calendar.
